

AB Box Liner

REDUCE WAREHOUSE STORAGE:
The AB Box Liner is designed as two custom die cut pieces that turn your ordinary cardboard box into a lightweight cooler for shipping perishable items.

Gusseted Liner

MATERIALS FDA APPROVED FOR INCIDENTAL FOOD CONTACT:
The Gusseted Liner is a leak resistant, one piece durable liner that is quick and easy to set up.

Pouches

COMMUNICATE YOUR BRAND TO YOUR CUSTOMERS:
TempShield™ Pouches offer an economical solution that provides thermal protection in a branded container.

TempShield™ Insulated Liners

When delivering perishable food to customer's homes is your business, maintaining consistent temperature over long distances for lengthy periods of time are challenges you face. TempShield™ provides solutions that help you deliver quality products to your customers.

Common Perishable Items Ideal For Tempshield™ Home Delivery

- Seafood, meat, and poultry
- Beverages including wine and juice
- Gourmet Foods
- Baked goods
- Dairy including ice cream, milk and cheese
- Confections including candies and chocolate

When time and distance factor into serving your customers, dry ice and other refrigerants can be placed into the package without damaging the liner to ensure exceptional quality.

Whether you are an e-grocer, meal delivery or meal subscription service looking to serve your customers through home delivery. The Tempshield™ solution has distinct advantages over other competing products.

Customer Experience

CUSTOMER EXPERIENCE

- Customers can be assured that the product they ordered online is delivered in an environmentally safe, FDA approved for food package that maintains product quality, taste and texture. No matter the distance your product travels, every home delivery with delight your customers.

Damage Reduction

MAINTAINING TEMPERATURE REDUCES DAMAGE

- Maintaining consistent temperatures in a cushioned protective package reduces damage and helps you present a quality product to your customer. TempShield™ works with humidity and moisture while inhibiting odor transfer by providing a flexible and tough protective cushioning that safely delivers your product to the home of every customer no matter the length of time or distance.

Cube Optimization

MANAGE TIME AND COSTS WITH CUBE OPTIMIZATION

- Selecting the right Tempshield™ application for every home delivery begins with offering your business 85 percent reduction in warehouse storage and saves 60 percent on outbound shipping costs, as compared to EPS material. With multiple applications that are both thin and lightweight, and provide superior temperature control, every home delivery will exceed your customer's expectations while allowing you to manage storage and shipping costs.
